

Lab #2

Néstor Cataño

Redes II

Due: DueDateGoesHere

Albert went to a Networking conference in which he was contacted to analyse a Wireshark network file captures that's hosted at <https://xxxx/conference.pcapng>.

Help Albert analyse the network traffic with WireShark! The goal of this challenge is to get comfortable with WireShark, you don't need to understand everything yet.

1. How many packets were captured?

Measurement	Captured
Packets	XXX

2. How many TCP streams?

TCP Streams
XXX

3. Which domain belonged to 81.166.122.238 at the time of capture?

IP	Name Resolution
81.166.122.238	XXX

4. What's the capture date?

First packet:	XXX
Last packet:	XXX

5. Which operating system did Albert use during the event?

OS:	XXX
------------	-----
